RESOLVED ISSUES

- Ticket #50942 – added a retry mechanism to the batch command when using Pub/Sub (streaming) as the source, to handle failures while inserting IIDs into the entity table. Two new hidden parameters have been added to the `[batch_process]` section of `config.ini` to control the retry behavior: `ADD_PUB_SUB_ENTITY_MAX_ATTEMPTS` (default: 5) and `ADD_PUB_SUB_ENTITY_RETRY_DELAY_MS` (default: 500 ms).
