FABRIC V8.3.4 RELEASE NOTES

- These Release Notes describe the new features in Fabric release V8.3.4 and list bugs that have been fixed since the V8.3.3 release.

- Certification of this Fabric release is based on:

  - Cassandra version 4.1.8

  - SQLite version 3.46.1

  - OpenJDK Runtime Environment 21.0.9+10

  - Confluent Kafka version 8.1.1

  - Neo4j enterprise 5.26.19

  - Elasticsearch 8.5.3 and 7.16.3

  - PostgreSQL 17.5

  - AWS OpenSearch:

    - Cloud: 3.1 and 2.17

    - On prem: 1.3.4

RESOLVED ISSUES

- **Ticket #47310** - jobs were failing with a *"Timeout: Pool empty"* error. The issue was resolved by fixing a connection leak occurring during parallel Broadway runs.

- **Ticket #48024** - resolved an issue where the environment certificate was always taken from the default `_dev`.

- **Ticket #48081** – fixed an issue where catalog masking returned `NULL` when a column was classified but no generator was assigned and the column was not marked as PII.

- **Ticket #48044** – resolved an issue where the Discovery process failed on PostgreSQL partitioned tables.

- Resolved an issue where `DocumentQuery` always returned template rows when the generated IID from TDM was provided instead of parent rows.

- **Ticket #48112** - upgraded Swagger UI to version 5.31.2.

- Resolved 3rd party security vulnerabilities.
