- Confluent Kafka version 7.6
- Neo4j 5.25.1 – enterprise

MAIN FEATURES AND IMPROVEMENTS

- Ticket #44238 – the default behavior of the deployment API has been changed to avoid forcing the LU sync process after deployment, when the 'noSync' parameter is missing. If users wish to keep the original behavior, they can set the FORCE_SYNC_AFTER_DEPLOY parameter to TRUE in the config.ini file under the [fabric] section.
- Resolving 3rd party security vulnerabilities.
